## Background:

5S is a cleanliness set of Jewellery for every organization. In the present world scenario, " Total Quality Management " has been only a driving force for business excellence. Under the TQM umbrella, " 5S " is the first step, so it is considered popularly as a " Gate way to TQM ". 5S is a silent informer of a company's attitude and quality.

The easiest way to determine a company's attitude towards improvement activities is simply to walk around a premises and observe housekeeping, which reflects the management's general attitude towards work.

The concept of 5S has emerged as the most critical tool across all industries including life sciences, because it is the foundation on which practically all other tools and waste elimination initiatives rest. This seminar will focus on methodology of implementation of 5S in pharmaceutical industries to create good working environment at work place.

---

## Methodology of Seminar:

- It will be a participatory seminar encouraging questions and sharing experiences between experts and participants.
- Performance of participants will be evaluated based on evaluation test.
- Participants will be awarded certificates from "Quality Circle Forum of India".

---
