

WASTE - A VALUE MANAGEMENT

Dear Members

Seasonal Greetings from QCFI !!

It's my pleasure on behalf of the Governing Council members of Quality Circle Forum of India (QCFI) Bengaluru Chapter to extend cordial invitation to a workshop on "WASTE - A VALUE MANAGEMENT" to be held on 30th July 2022

Our team wish to continue the knowledge sharing through new concepts associated with manufacturing.

Today in this competitive world with the tough economic challenges around it is felt that there is a need for us to focus on avoiding wastages in all areas of our operations. In line with the same thought, we are conducting this awareness program on WASTE management from the perspective of value generation and value addition.

This workshop shall enable industries understand and initiate small improvement activities in their organizations to enhance their cost reduction activities, by avoiding wastages to bring improvements in terms of safety, quality and productivity across the industries.

For this initiative from QCFI, JSS Academy of Technical Education, Bengaluru (JSSATEB) has volunteered to join hands with us to promote and support this very important program benefiting the academic staff and industries.

Hence, we request the organizations for their continued support by nominating key management persons/employees for this workshop.

Looking forward to your continued support and cooperation

With warm regards

B. Thej Kumar
Chairman
QCFI Bengaluru Chapter

In Association with

JSS Academy of Technical Education, Bengaluru

Announces

WORKSHOP on WASTE - A VALUE MANAGEMENT 30th JULY 2022

Theme: Value addition through waste elimination

Venue: JSS Academy of Technical Education, Uttarahalli- Kengeri Road Srinivaspura post, BENGALURU

ABOUT THE WORKSHOP

QCFI Bengaluru, has always been spearheading the knowledge sharing activity, and post covid it's imperative to have very effective cost improvement and cost saving methods to sustain and grow. That's where the GC team of QCFI Bengaluru developed the idea of creating an awareness on unique areas of activities through this workshop.

In today's changing scenario it's important for all the industries to focus on such value optimization measures, in lesser-known areas. These types of approach by industries and also an insight by educational institutions will help the emerging engineers to build their career as per the industry requirements.

JSS Academy of Technical Education (JSSATE) was established in the year 1997 at Bangalore under the umbrella of JSS Mahavidyapeetha, Mysore. It has an excellent infrastructure with the state-of-the art equipment and machinery as laboratory facilities. Being one of the renowned colleges of Bengaluru, has seven Under Graduate and four Post Graduate program in Engineering along with a post Graduate program in Business Administration.

WASTE MANAGEMENT - Most industries today are reeling under pressure of cost due to the economic challenges posed due to pandemic and also the changing trends in the market and customers. One of the low focused areas is about identifying the waste in every process and product activities within the organizations.

Hence this necessitates the need for a more structured and magnified approach of all industries to embark on the journey of waste identification and value addition of every process in the organization.

WORKSHOP – The program shall have exposure to Waste management approach covering the various aspects of Japanese manufacturing concepts and tools like, **Lean manufacturing, Value stream mapping, Space productivity, CIRCULAR economy and CASE STUDIES based activities for the participants.**

Participants shall be made to identify MUDA through model making activities and and process observations.

The speakers are experts in manufacturing areas having worked/ working for renowned Indian and a Japanese organization. Their hands on experience and knowledge would be effective in propagating the need for waste management.

2. FOR WHOM

This program is open to members Supervisory and Management staff & officers, from Maintenance, Manufacturing, Engineering & QA/QC operations team. Students from Mechanical and Industrial Engineering shall be gaining knowledge on new approach of industrial management.
