28th& 29thFebruary 2024

at

Quality Circle Excellence Centre

Plot No: J/P-10, TELCO Road, MIDC Bhosari, Pune 411 026

9.30 am to 5.30 pm

QCFI Pune chapter is pleased to announce the training program on Lean Safety Circle a new concept for Industrial Safety improvement.

Occupational Safety has assumed immense importance in the industrial era and proactive actions towards this are demanded by all in the industry.

QCFI has come out with the innovative concept of Lean Safety Circle which can help organisations to address this important issue.

The program will address the following concern areas.

- To improve grass root employees knowledge on occupational safety.
- To improve observation power.
- To differentiate between Hazards and Risks.
- To understand five human factors which are responsible for 90% of accidents.
- To understand near misses and the importance of reporting.
- Improve analytical power.
- To have a better documentation system.
- To improve teamwork. This is the most important factor which has been "MAGIC" in case of "Lean Safety Circle" and brings in sustained improvement culture.

Program for Whom?

The program is meant for all supervisory staff including safety staff who are keen on bringing the improvement in occupational safety in their work area, be it a work shop or construction site, or a process plant.

A highly interactive session with Lectures, Case Studies, Films, Activities, Exercises and Group Discussions

Methodology:

- PPT presentation, Photos, relevant video, discussion on actual case study, and exercises at almost all steps.
- The course will cover case studies on both lead indicators and Lag Indicators
- How to distinguish between unsafe acts, near misses, and accident
- General safety will be discussed before starting of safety circle session
- Evaluation criteria of safety circle for both (Lead and Lag Cases)
- Pre and post-evaluation will be done with 20 Multiple Choice Questions (questions will be on problem-solving tools and techniques and general safety)
