P.I. Industries

About the Conclave:

The 3rd HR Conclave aims to empower HR professionals to lead transformation in a rapidly evolving world. This one-day event will provide tools, insights, and connections to help **shape resilient, inclusive, and future-ready organizations.**

Objectives:

- **Encourage and inspire HR professionals** to look beyond today and prepare for the challenges and opportunities of the future
- **Equip participants** with up-to-date frameworks, strategies, and actionable insights to drive real impact.
- Create a space for **peer-to-peer learning, expert interaction,** and the exchange of **real-world experiences**
- Explore **innovative approaches** to address the evolving needs of today's and tomorrow's workforce

Why This Conclave, Why Now?

1. AI is Here—But It's Not Replacing Us

Rather than replacing people, AI is transforming how we work. HR must champion its **ethical integration**, drive reskilling, and lead the human-tech partnership.

2. Gen Z is Redefining the Workplace

The new workforce demands **transparency, empathy, and equity**. Organizations must evolve to meet these expectations authentically.

3. Skills Over Degrees

The shift from degree-based to **capability-based hiring** is accelerating. HR can redefine how talent is identified and nurtured.

4. People Analytics Will Drive Strategy

Data is no longer optional; HR professionals must use **analytics to influence decisions, forecast trends**, and drive **measurable impact**.

5. DEI is a Strategic Imperative

Diversity, equity, and inclusion must be **embedded** into every **policy, process, and leadership decision**—not treated as an initiative.

6. Workplace Civility is a Competitive Advantage

Psychological safety, empathy, and fairness are not just values—they are strategic assets that define high-performing, **resilient workplaces**.

Program Schedule:
